

RightMed® Medication List

The RightMed Comprehensive Test is a prescription pharmacogenomic (PGx) test that analyzes an individual's DNA to help providers determine how he or she may respond to certain medications.

The following table lists medications that will be classified in the RightMed Comprehensive Test Report according to an individual patient's genotype and the medication interaction determined by the RightMed Test. Classification consists of major, moderate, and minimal gene-drug interactions.

ANALGESIC /

ANTI-INFLAMMATORY

Celecoxib (Celebrex®)
Codeine
Flurbiprofen (Ansaid®)
Ibuprofen
(Advil®, Motrin®)
Meloxicam (Mobic®)
(Kadian®, MS Contin®)
Piroxicam (Feldene®)
Tramadol (Ultram®)

ANTICOAGULANT /

ANTIPLATELET

Clopidogrel (Plavix®)
Warfarin
(Coumadin®, Jantoven®)

CARDIOVASCULAR

Atorvastatin (Lipitor®)
Fluvastatin (Lescol®)
Lovastatin (Mevacor®)
Pitavastatin (Livalo®)
Pravastatin (Pravachol®)
Propafenone (Rythmol®)
Rosuvastatin (Crestor®)
Simvastatin (Zocor®)

ENDOCRINOLOGY

Nateglinide

GASTROENTEROLOGY

Dexlansoprazole (Dexilant®)
Dronabinol
(Marinol®, Syndros®)
Lansoprazole (Prevacid®)
Metoclopramide (Reglan®)
Omeprazole (Prilosec®)
Ondansetron (Zofran®)
Pantoprazole (Protonix®)

GENETIC DISEASE

Eliglustat (Cerdelga®)

HEMATOLOGY /

ONCOLOGY

Belinostat (Beleodaq®)
Capecitabine (Xeloda®)
Fluorouracil
Gefitinib (Iressa®)
Irinotecan (Camptosar®)
Mercaptopurine
(Purixan®)
Nilotinib (Tasigna®)
Pazopanib (Votrient®)
Thioguanine (Tabloid®)

IMMUNOSUPPRESSION

Azathioprine (Imuran®)
Tacrolimus (Prograf®)

INFECTIOUS DISEASE

Abacavir (Ziagen®)
Atazanavir (Reyataz®)
Efavirenz (Sustiva®)
Voriconazole (Vfend®)

NEUROLOGY

Amitriptyline (Elavil®)
Brivaracetam (Briviact®)
Carbamazepine
(Carbatrol®, Tegretol®)
Clobazam (Onfi®)
Donepezil (Aricept®)
Fosphenytoin (Cerebyx®)
Phenytoin (Dilantin®)

PSYCHIATRY

Amitriptyline (Elavil®)
Amphetamine
Aripiprazole (Abilify®)
Brexpiprazole (Rexulti®)
Carbamazepine
(Carbatrol®, Tegretol®)
Citalopram (Celexa®)
Clomipramine
(Anafranil®)
Clozapine (Clozaril®)
Desipramine
(Norpramin®)
Doxepin (Silenor®)
Escitalopram (Lexapro®)
Flibanserin (Addyi®)
Fluoxetine (Prozac®)
Fluvoxamine (Luvox®)
Iloperidone (Fanapt®)
Imipramine (Tofranil®)
Nortriptyline (Pamelor®)
Paroxetine (Paxil®)
Quetiapine (Seroquel®)
Sertraline (Zoloft®)
Trimipramine (Surmontil®)
Venlafaxine (Effexor®)
Vortioxetine (Trintellix®)

RHEUMATOLOGY

Allopurinol
(Aloprim®, Zyloprim®)
Cevimeline (Evoxac®)

SLEEP MEDICINE

Doxepin (Silenor®)

UROLOGY

Tamsulosin (Flomax®)

The RightMed test's medication reporting may vary based on local regulations. The RightMed test results provided for these medications are not intended to be the only information used in medication decisions for a patient; the results do not include other factors that the prescriber should consider. The test does not specify whether or not the individual should or should not take these medications. The healthcare provider remains ultimately responsible for all diagnosis and treatment decisions. Commonly used trade names for medications are listed for reference only. The list may not be inclusive of all trade names available and does not indicate preference or recommendation by OneOme of one medication product over another.

LIST CURRENT AS OF SEPTEMBER 2025, SUBJECT TO CHANGE
